

tour edge Exotics CB2

touredge.com | \$219

Should a hybrid be iron-like or wood-like? In this case, it's the latter, as the Exotics CB2 packs a powerful punch. Equipped with the same technology found in Exotics fairway woods (a titanium cupface

and steel body), the Exotics CB2 is billed as a hybrid that produces the distance of a fairway wood with the accuracy usually found in a hybrid. Either way, it's a long and powerful tool from the tee or the fairway.
