Shafts: Graphite Design X-Quad (X, S, R, A); Custom shafts available

tour edge Exotics CB2

touredge.com | (800) 515-3343 | \$349

We really didn't think Tour Edge had much room to improve upon the original Exotics fairway, but they proved us wrong. The CB2 is even better.

Features: The Exotics CB2 has the same steel body/Titanium cup-face design of the original; however, this time the titanium is lighter and the clubhead stretched farther back for an even higher MOI and greater forgiveness.

Advantages: The Exotics CB2 has a higher launch angle, making it easier to get the ball airborne in a hurry, even though it has a lower spin rate. What's that mean? It means the ball travels higher and spins less, for greater distance.

Benefits: Everyone who wants a go-to club from deep in the fairway.

What We Like: It looks great, feels great and is unbelievably long.

Lineup: Exotics, **Exotics CB2**, Bazooka JMAX QL
