

Tour Edge Bazooka GeoMax Driver

OVERALL MEMBER RATING 8.8

The Bazooka GeoMax driver from Tour Edge Golf uses geometry to maximize the moment of inertia [resistance to clubhead twisting on off-center shots] by featuring maximum clubhead dimensions. Its 460cc titanium clubhead combines with a fixed 20-gram tungsten sole weight to deliver a moment of inertia measured at 5,000 g/cm². All this translates into remarkable forgiveness to keep golfers in the fairway. Available in lofts of 9, 10.5, 12, 14 and 16 degrees and fitted with a Grafalloy shaft. For more information, contact: Tour Edge Golf, 800-515-3343, www.touredge.com. \$199

Harold Medina, Hollywood, FL: "The feel and forgiveness of the GeoMax driver is amazing. I did not lose any distance on mishits, but when hit on the sweetspot I gained 15 yards."

Allan Lips, Germantown, TN: "For the price, the GeoMax driver is an exceptional value. Simply put, it is a driver that wants to go straight and long with excellent accuracy."
