

tour edge JMAX Milled Face

A number of different models intended to fit varying playing conditions and players of all swing types.

Features: The JMAX is made from soft 8620 carbon steel with

a chromed-satin finish and comes in different bounces to accommodate different playing conditions and swing styles.

Advantages: The soft 8620 carbon steel promotes a good feel, while the JMAX's computer-milled score lines and face will give golfers unbelievable control and spin.

Benefits: With a number of different bounce models available, there's a JMAX for everyone.

What We Like: These things generate so much spin, you could back your ball up on a marble floor.
