

A lightweight titanium "cup face" brazed to the heavy steel body leads to built-in forgiveness and superior distance.

FAIRWAY WOOD

Tour Edge Exotics XCG

\$349, graphite; touredgegolf.com

This is a real treat to hit—it's longer and more consistent than the others tested. The XCG has a weighty feel to it during the swing, nice stability and explosive power at impact. For those willing (and able), it's easy to draw or fade on command, to put the ball where you want.

TESTER'S COMMENT

"These bring me up to my full fairway wood potential."

Rich Bernstein (handicap 12)
