**Guaranteed Longer -- Tour Edge's New XCG-3  
Driver Is So Good It's Guaranteed.**

Batavia, IL - In a world where innovation is often restrained by compromise and challenges, the new Exotics XCG-3 driver from Tour Edge Golf emerges as a manufacturing marvel and performance breakthrough. In fact, the XCG-3 is so good Tour Edge guarantees you will hit it longer than your current driver.

Ingenious in design, the XCG-3 driver combines tungsten sole weights, a titanium face and body, and an amorphous carbon crown. In the Exotics tradition, the components feature interlocking channels that are chemically brazed and vacuum heat-cured for permanent bonding without welding. The result is a more pure energy transfer for longer, more powerful drives.

The power plant for this workhorse is a 460cc, aerospace titanium body and cup face. The XCG-3's face incorporates Exotics variable face thickness technology to deliver an explosive rebound from anywhere on the face. Performance-enhancing details exist even out of sight. Our X-contour face technology generates faster launch

speed from all areas of the face. The inner O-ring allows the outer edges of the face to be made thinner for a larger sweet spot, greater ball speed and less variation between center and off-center hits.

Advancements in the XCG-3's crown have been developed through the use of amorphous carbon, a lighter stronger version of carbon materials previously used in golf. This new carbon allows for a thinner crown, allowing even more weight to be positioned in the sole in the form of tungsten weights. With a total mass of 28-grams, the weights create the lowest, deepest center of gravity of any Exotics driver yet. The result is a higher moment of inertia, less club head twisting and score-saving forgiveness.

Innovation, technology, style, power, control and feel – The XCG-3 is pure Exotics and the culmination of everything a golfer wants from a driver. Tour Edge invites you to take the XCG-3 challenge and discover for yourself the extra distance you've been waiting for. If you are not completely satisfied, the club can be returned under the company's 30-day play guarantee for a store credit or refund depending on the retailer's policy. The driver sells for \$349 and comes with a Fujikura Motore Exotics 65 graphite shaft. All Tour Edge clubs come with lifetime warranty. For more information, call (800) 515-3343 or visit [www.exoticsgolf.com](http://www.exoticsgolf.com).

Located in Batavia, IL, Tour Edge manufactures and sells golf clubs under both the Exotics and Tour Edge brands names. Exotics golf clubs are for those who demand the finest performing golf clubs in the world. With experienced designers and smaller production runs, Exotics by Tour Edge can bring futuristic technologies to the marketplace months, even years, ahead of its time. Exotics' manufactures the finest quality, high-technology golf clubs and hand-assembles them one set at a time. The company's clubs are distributed throughout the United States and the world. Availability ranges from some of the finest green-grass locations in the country to the largest discount golf shops. High resolution images are available at [www.touredge.com](http://www.touredge.com) (select media site).
